EXAMINATION TABLES S

We make it our priority that the examination table fulfills the specific requirements of your medical office. Visit our **ON-LINE CONFIGURATOR** and equip the table so that it perfectly supports your daily tasks and provides your patients with safety and maximum comfort.

CONFIGURE

Simple adjustment lever design
- easier to press and clean
- stronger due to mechanism integrated in the frame

Upholstery
- soft 6 cm (optional 8 cm) thick padding for maximum patient comfort
- high quality biocompatible imitation leather
- seamless and fully sealed
- wider lying surface due to the padding finished at a right angle

Hand switch includes CPR button for fully extended position, SOS button for Trendelenburg position and a memory function to store a position of practitioner's choice.

Table base
- ABS plastic cover is screwless for easier cleaning
- increased stability due to standard 250 kg safe working load

Stronger control unit
- new software enables synchronous movement of two table sections
- easier to replace

Soft retractable system
- includes a shock absorber to soften the release of castors

Circular switch
- simple up & down operation from all sides of the table

High hygiene standards and maintenance

To ease the maintaining of **high hygiene standards** required in medical practices, the **SEAMLESS UPHOLSTERY** is **water** and **other liquid resistant** and **FULLY SEALED** also from the under side. It is made of high quality **BIOCOMPATIBLE** imitation leather. The **ABS PLASTIC COVER** that protects the table base is **SCREWLESS** and thus **completely smooth**. The **design** of head and leg section **ADJUSTMENT LEVER** is **simplified**. The lever is **longer, easier to press** and **clean** and the mechanism **integrated** in the frame makes it even stronger.

Position your patient safely and with ease

You can choose between **ELECTRICALLY** or **HYDRAULICALLY ADJUSTABLE** examination tables. Simple height adjustment enables **easy access** for patients as well as **comfortable working height** for the personnel. By pressing the **CIRCULAR SWITCH** down or pushing it up you can **raise** or **lower** electric tables completely effortlessly from **all four sides of the table**. The height on the hydraulic examination tables can be adjusted by pressing the **FOOT PEDAL** on **two sides** of the table. The **HAND SWITCH** is part of standard equipment of examination tables SXLP, S3 and S4, and, in addition to adjusting the height and the table's sections, also includes the **CPR** and **SOS buttons**. In case of emergency, the **completely flat** or the **Trendelenburg position** will set within seconds by pressing a single button. During examinations, the **table stands firmly** on thoughtfully designed **RUBBER FEET**. When activating the **RETRACTABLE CASTORS**, the **shock absorber softens the release** and the table can be effortlessly moved across the room. The **STRONGER CONTROL UNIT** with a new software enables **synchronous movement** of two **table sections**, which speeds up patient positioning. The standard **SAFE WORKING LOAD** is **250 kg**, which adds to table's **PERFECT STABILITY**. The **positioning of overweight patients** in particular is safer and easier.

For general and specialized examinations

DIFFERENT MODELS of examination tables **meet the needs** of medical personnel and patients during **general and specialized examinations and treatments**. You can choose among two-, three- or four-section tables **allowing different patient positions**. Examinations are performed easier and more efficiently if the patient is positioned appropriately. Additionally, you can choose from a **VARIETY OF ACCESSORIES** that are attached to fixation rails to be right at hand during examinations. The 6 or 8 cm thick **padding** offers **UNPARALLELED COMFORT** for the patient when lying throughout an examination. The **lying surface** is **wider** due to the **padding finished at a right angle**. **MORE THAN 30 COLORS** of imitation leather are available so the table can perfectly match the other equipment in your practice.
